Johannesburg, 2001

Profile

Software Engineering graduate with hands-on experience in systems analysis, software design, coding, testing, and integration. Skilled in Java, Python, RESTful APIs, databases, and testing, with a track record of improving and debugging existing systems. Strong analytical thinking, problem-solving, and cross-functional collaboration abilities. Passionate about learning new technologies, contributing to team success, and delivering high-quality, user-focused software solutions.
